Master Planning & Design Delivery Experience

Extensive experience in GIS-based spatial and thematic analysis supporting large-scale master planning and development control frameworks. Can also develop urban concepts, prepare multiple design options, and produce hand-drawn sketches and digital graphics using Illustrator and related tools; apply Development Control Regulations (DCR) and land-use governance mechanisms to refine and validate preferred scenarios; develop and optimize master plans aligned with infrastructure and regulatory constraints; create compelling 2D illustrated plans and 3D visualizations of entire sites; and compile findings into structured reports and presentations for stakeholders and approvals.

Skills

Design

Site Analysis | Concept Design | Urban Design | Master Plan | Urban Renewal | Design Guidelines

- Contributed across all stages of planning delivery, from early concept development through preliminary master plans to detailed design and final outputs.
- Produced GIS-based site analysis diagrams illustrating existing conditions, future developments, connectivity, topography, and contextual aerial mapping to support evidence-based design decisions.
- Developed urban and master plan concepts for both large-scale and small-scale projects using hand sketches and Adobe Illustrator, translating ideas into clear spatial strategies.
- Designed land-use frameworks, open space networks, and community facility distributions, ensuring functional, balanced, and compliant urban structures.
- Conducted urban design studies for cluster and neighborhood centers, including placemaking strategies, walkability analysis, pedestrian and vehicular circulation, and landscape integration.
- Coordinated with multidisciplinary teams (roads, traffic, utilities, and infrastructure) to ensure design feasibility and alignment with technical requirements and authority standards.
- Supported preparation of urban design guidelines and design control frameworks to guide consistent development outcomes and implementation quality.

Professional History

Dubai Holding Land Estates

Senior Manager - Development
2025-Present

Ras Al Khaimah Municipality

Senior Urban Planning Specialist
2014-2025

Parsons Corporation, Dubai, UAE

Junior Urban Planner
CADD Supervisor
CADD Draftsman
2005-2014

Parsons Corporation, Doha, Qatar

CADD Draftsman
2004-2005

Parsons Corporation, Makati, Philippines

Associate Designer
2001-2002

Skills

Design

Graphics

3D Modeling and Rendering

Reports and Presentations

CADD

GIS

HTML and CSS

Education

Bachelor of Science in Architecture

Bicol University, Philippines
2000

Selected Projects

- Developed a Structure Plan Concept (18,000 ha) using a polycentric model comprising residential-commercial centers, hospitality and recreation zones, and a business park.
- Designed detailed master plans for multiple projects with a combined area exceeding 300 hectares, from concept through detailed design coordination.
- Conducted public realm and urban design studies for 3 urban districts, focusing on placemaking, connectivity, and pedestrian-oriented environments.

Graphics

Adobe Creative Suite | Photoshop | Illustrator | InDesign | After Effects

- Highly skilled in visual communication and presentation design for master planning and urban design projects using Adobe Suite.
- Developed concept illustrations, illustrated master plans, and urban design strategy diagrams to support design development and approvals.
- Produced motion graphics and animated presentations using After Effects to enhance storytelling and stakeholder engagement.
- Created a 3-minute marketing video for a master plan development in Ras Al Khaimah, used as promotional material for client and stakeholder presentations.

Selected Project

- **Awafi Sustainable District.** Developed visualization and presentation material for the Awafi Sustainable District, including master plan illustrations and marketing visuals supporting project communication. The project was officially [launched on November 2023](#).

3D Modeling and Rendering

3ds Max | V-Ray | SketchUp | Adobe After Effects | Adobe Photoshop | Adobe Mixamo

- Developed a high-detail 3D master plan model (~400 ha) including roads, buildings, streetscapes, landscape, parks, and community facilities, producing high-resolution rendered visuals used for marketing and stakeholder presentations.
- Produced photorealistic architectural and urban visualizations using 3ds Max and V-Ray to support design and communication of master plan concepts.
- Created and integrated animated character assets using Adobe Mixamo for use in fly-through sequences and presentation videos.
- Developed cinematic fly-through animations of large-scale master planned developments using 3ds Max and V-Ray, showcasing spatial experience and design intent.
- Led post-production and video compositing using Adobe After Effects, integrating motion graphics, annotations, and music to deliver a 3-minute marketing presentation video for a master plan project.

License & Certification

Architect

Philippine Professional Regulation Commission (PRC)
Jan. 2001
PRC No. 16456

Affiliation

United Architects of the Philippines (UAP)
Member, 2001-Present

Distinction

8th Placer
Licensure Examination for Architects
Philippine Professional Regulation Commission (PRC)
Jan. 2001

Selected Project

- **Awafi Sustainable District.** Developed advanced 3D visualization outputs to communicate the master plan, including detailed digital models, high-quality rendered perspectives, and animated sequences. Translated planning concepts into immersive visual content to support project positioning, stakeholder engagement, and [launch on November 2023](#). The produced visuals and animations were also utilized for digital campaigns, including [social media](#) content—primarily featured on Ras Al Khaimah’s official Instagram platform—to enhance public outreach and engagement.

Reports and Presentations

InDesign | PowerPoint

- Produced high-quality reports, manuals, and presentation materials to support master planning, policy implementation, and stakeholder decision-making.
- Led the development and design of the Ras Al Khaimah Addressing Manual—an emirate-wide framework enabling the successful implementation of the first unified addressing system.
- Developed comprehensive design guidelines and planning documents, integrating graphics and technical content to ensure clarity, consistency, and effective communication.
- Delivered strategic presentations to senior management and stakeholders, translating complex planning concepts into clear, visually compelling narratives.
- Recognized for producing engaging, story-driven presentations that enhance understanding and support project approvals.

Selected Project

- **Addressing Manual.** Authored the emirate-wide Addressing Manual that established standardized street naming and property numbering across Ras Al Khaimah. Defined the structure, logic, and technical guidelines to support a consistent and scalable system aligned with GIS integration and government requirements. Translated complex spatial and regulatory information into clear, well-structured documentation and visual materials to support implementation, stakeholder understanding, and decision-making. The manual formed the foundation for the successful launch of the [Addressing System](#) in 2021 and continues to support its ongoing application across the emirate.

Geographic Information System (GIS)

ArcGIS Pro | ArcMap | Spatial & Thematic Analysis | ModelBuilder

- Applied GIS tools to perform comprehensive spatial and thematic analysis supporting large-scale master planning and urban development projects across the UAE.
- Developed data-driven mapping outputs to evaluate site conditions, land-use distribution, infrastructure constraints, and development potential—informing planning strategies and design decisions.
- Utilized ArcGIS Pro ModelBuilder to automate repetitive workflows, improving efficiency, consistency, and scalability of analysis across multiple project sites.
- Supported planning initiatives through evidence-based insights, contributing to site analysis, scenario testing, and decision-making processes.

Selected Project

- **Confidential Project – Ras Al Khaimah Municipality.** Conducted comprehensive GIS-based spatial analysis using ArcGIS Pro to support land allocation planning. Developed layered thematic mapping to systematically assess constraints, including floodplains, utility corridors, land ownership, and topography, enabling accurate identification of suitable parcels. Applied a structured filtering approach to isolate unconstrained land parcels, supporting informed decision-making for land grants to citizens while ensuring compliance with planning and infrastructure considerations.

CADD

AutoCAD | MicroStation | Bentley MX Roads

- Advanced proficiency in industry-standard CADD platforms, supporting multidisciplinary planning and infrastructure coordination across large-scale developments.
- Developed and implemented an efficient workflow for converting MicroStation datasets into AutoCAD, significantly reducing manual rework and improving cross-platform collaboration between design teams.
- Utilized Bentley MX Roads to generate accurate 3D terrain and roadway models for complex, hilly sites, enabling seamless integration with visualization workflows. The models were successfully transferred into 3ds Max and used as a base for detailed site modeling and high-quality render production.
